

DH-SD5R404GA-HNF

4MP 4× Starlight+ Smart Dual Illumination Network PTRZ Camera

Wiz Mind

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, IVSS,NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive AI solutions for verticals.

Series Overview

The SD5R Series camera utilizes advanced PTZ three-axis technology, offering pan, tilt, rotation and zoom functionality that can be easily accessed. Its unique design ensures a straightforward installation and maintenance process, eliminating the need for on-site manual adjustments. In addition, it was specially engineered to allow for setup and maintenance without the need to remove the case, providing protection against lens contamination from fingerprints and more.

Functions

Smart Dual Light

Dahua Smart Dual Light technology adopts smart algorithm to detect targets. Usually, the IR illuminator is on at night; when the target appears in the monitoring area, the white light is on, and the camera records the full-color video and information of key events. That is, the camera links snapshot and video with full-color image. When the target is out of the monitoring area, the white light is off and the IR illuminator is on, which reduces light pollution efficiently.

Video Metadata

Metadata is information on the attributes of targets that is extracted during monitoring. It can be used for data retrieval. There are four kinds of metadata supported by Dahua PTZ WizMind cameras: Human face, human body, motor vehicle and non-motor vehicle. Face information includes gender, age, glasses, masks, beards, and more. Human body information includes hat, top, top color, bottom, bottom color, bag, and more. Motor vehicle information includes plate color, type, vehicle color, sun visor, ornament, calling, seatbelt, smoking, annual inspection sticker, and more. Non-motor vehicle information includes type, color, top type, top color, people number, and more.

AI-ISP

With AI ISP technology, the camera is able to easily adapt to scenes, producing high quality images that reveal the fine details of targets.

- PTRZ Tecnology
- · IP67&IK10
- 1/1.8" 4Megapixel STARVISTM CMOS
- 4x optical zoom
- Max. 50/60fps@4M(2560x1440)
- starlight+ technology
- · IR&Warm light distance up to 30m
- · SMD 4.0
- · Perimeter protection
- · Face recognition
- · Video Metadata
- Privacy Protection: Mosaics can be automatically placed over the face or body of a person to protect their privacy
- · Built-in dual MICs; 1-ch speaker; support two-way talk.

PTR7

The innovative PTZ triaxial technology improves the efficiency of camera installation and maintenance, enhancing user-friendliness and eliminating the need for on-site manual adjustments.

Parking Space Management

With Parking Space Management, the camera can count the number of parked vehicles and parking spaces available in open parking lots and planned parking lots. It can extract and display the status of parking spaces, so as to facilitate the management of parking spaces and improve parking efficiency.

ANPR

With high-performance GPU chip, deep learning algorithm, and lots of sample training learning, Dahua ANPR technology can automatically collect and recognize the vehicle information, including license plate, logo, vehicle type, and vehicle color.

AcuPick

This industry-leading search technology effectively utilizes both frontend and back-end intelligence to help with searching through massive video data to quickly and conveniently locate targets with greater precision.
